## CONVENTIONAL DEMOLITION

Demolition isn't always that scientific. Anyone with a sledgehammer can tear a building down, but what separates Demcon Group is our professionalism. We handle the job quickly and deliver on what we promise. While implosions provide a better show, conventional demolition can sometimes be the more practical choice.

## SELECTIVE DEMOLITION

Sometimes you don't want to knock the whole building down. We love the tough jobs, whether it's selectively removing a building facade or turning one building into two. Other times it's simply a matter of making sure nothing get demolished that isn't supposed to be.

## RECYCLING & LEED CERTIFICATION

We recycle everything possible not just because it's good for the environment, but also because it allows us to offer the most competitive proposal possible. Plus, we're able to track our recycling for LEED certification.

## IMPLOSIONS

Our team has successfully coordinated and completed numerous implosion projects. We bring our engineering knowledge to every job, large or small.
